Sample Diagnostics Laboratory, Abu Dhabi

SAMPLE REPORT - made-up data for testing Masar. Not a real patient.

Anti-Mullerian Hormone (AMH)

Patient: Noura Al Mansouri
Date of birth: 1992-03-14
Sample collected: 2026-10-28 Reported: 2026-10-28

Test	Result	Unit	Reference range
Anti-Mullerian Hormone (AMH)	1.3	ng/mL	1.0 - 4.0 (age 30-35)
Anti-Mullerian Hormone (AMH)	9.3	pmol/L	7.1 - 28.6

Method: electrochemiluminescence immunoassay.
AMH reflects ovarian reserve. It does not predict natural fertility on its own.
Interpret together with age, cycle history and antral follicle count.
